

Denial Audit Report

Prepared for **Demo Counseling Group** · July 10, 2026 · Confidential

Our analysis of your remittance data found **\$2,040.00** in denied claims that are still appealable, with an estimated **\$1,127.00** realistically recoverable.

13 workable denials · 1 must be appealed within 30 days · 1 past their appeal deadline (excluded from estimates)

Where the money is: root causes to attack first

One fix often unlocks an entire group of claims. Ranked by expected recovery:

Payer	Denial reason	Claims	Denied \$	Expected recovery	Days left	What gets it paid
AETNA	CARC B7 Provider not certified/eligible to be paid for this service on this date	4	\$625.00	\$406.25	139	Credentialing/enrollment gap. Fix enrollment or bill under supervising provider per payer rules, then rebill EVERY affected claim - these come in expensive strings.
BCBS TX	CARC 197 Precertification/authorization absent	2	\$300.00	\$150.00	148	Request retro-authorization where payer allows; appeal with clinical necessity + any auth reference numbers. Often affects a whole string of visits - fix once, rebill all.
CIGNA	CARC 109 Claim not covered by this payer/contractor	1	\$180.00	\$126.00	152	Identify correct payer (check member ID/plan), submit there. Watch the correct payer's timely filing clock!
UNITEDHEALTHCARE	CARC 16 Claim/service lacks information or has submission/billing error	1	\$145.00	\$116.00	45	Read the RARC for the specific missing element, supply it, resubmit. Usually fast money.
AETNA	CARC 227 Information requested from patient not received	1	\$165.00	\$90.75	159	Contact patient to complete payer questionnaire (accident/COB forms), then resubmit.
CIGNA	CARC 151 Payment adjusted - frequency/units exceed allowed	1	\$165.00	\$74.25	158	Appeal with documentation of medical necessity for frequency (common for BH visit limits), or verify units billed correctly.
BCBS TX	CARC 242 Services not provided by network/primary care providers	1	\$165.00	\$66.00	155	If provider IS in network: appeal with contract/roster evidence (common after payer roster errors). If truly OON, check OON benefits.
UNITEDHEALTHCARE	CARC 29 Time limit for filing has expired	1	\$160.00	\$64.00	35	Appeal WITH proof of timely original submission

Attack-first claim list (top 13)

Claim	Payer	CPT	DOS	Denial	Denied \$	Expected \$	Appeal deadline
ACG-2008	CIGNA	90791	2026-05-27	109 wrong_payer	\$180.00	\$126.00	152 days

What happens next

If you'd like these worked: we prepare and submit the appeals (a person reviews every one before it goes out), you approve the claim list up front, and **all payer payments continue to flow directly to your accounts — we never touch your money**. Our fee applies only to claims on the approved list that actually get paid, verified against your own remittance files. Nothing recovered, nothing owed.

Estimates are based on denial codes, payer appeal windows, and typical overturn rates for each denial category; actual results depend on documentation and payer review. This report is not legal or billing advice. Recovery estimates exclude patient-responsibility amounts and expired claims. Total denied in file reviewed: \$2,200.00 across 14 claims.
